Summary

Software / Machine learning Engineer | Instructor

Versatile software engineer with 2 years of experience specializing in front-end development using React, JavaScript, and SCSS modules, and 1 year of university-level instruction in Python. Played a key role in redesigning a major CRM system for a bank, improving user workflows by more than 30% and significantly reducing operational costs. Adept at building responsive, maintainable interfaces and optimizing performance in production environments. Known for clear communication, collaborative problem-solving, and a strong focus on user-centric design and efficiency.

Keywords: React.js | JavaScript | SCSS Modules | Front-End Development | Python Programming | University Instruction | Software Engineering | Web Application Development | CRM Redesign | Workflow Automation | User Experience (UX) | Git & GitHub | CI/CD Pipelines | DevOps Practices | Agile Development | Jenkins | Containerization | System Monitoring | Infrastructure as Code (IaC) | Bash Scripting | Technical Communication | Performance Optimization | Cloud Deployment | Version Control | Cost Reduction | Code Maintainability | Process Optimization

Experience

Eurobank S.A | Banking / Software | Athens, Greece | Full-time | On-site / Hybrid | April 2023 – Present

Software Engineer

- Worked across multiple teams in an Agile environment and across multiple codebases, to enhance the CRM of the Bank.
- Helped generate potential profits of more than 10 million Euros via the creation, deployment and maintenance of new systems.
- Helped optimize workflows by an average of 18% across multiple systems
- Led the development of the KPI management system for employees that enhances productivity and help increase the banks revenue

European Business Institute (EBU) | High level education | Luxembourg | Part time | Remote | Sep 2024 - Present

Python Instructor

- Designed and delivered engaging Python and Data Science programming lectures for graduate students, covering topics from foundational syntax to data science and machine learning applications.
- Created hands-on coding exercises and real-world projects to reinforce theoretical concepts, improving student project performance by 25%.
- Provided individualized support and mentorship, helping students build confidence and proficiency in software development.
- Collaborated with academic staff to align course content with industry-relevant skills and evolving technologies.
- Developed supplementary learning resources, including slide decks, coding notebooks, and GitHub repositories to enhance learning continuity.
- Incorporated version control and best practices into the curriculum, introducing students to tools like Git and collaborative workflows.

Education

-
- **MSc in Data Science and Artificial Intelligence** | European Business Institute (EBU) | Luxembourg
 - **BSc in Computer Science and Biomedical Informatics** | University of Thessaly | Lamia, Greece

Language Skills

Greek (Native language) | **English** (Proficient) | **German** (Limited proficiency) |

IT Skills

CRM Tools (Microsoft Office Apps , SAP) | **Remote Work Tools** (Microsoft 365, Zoom) | **Financial Reporting Tools** (QuickBooks, Microsoft Excel) |
